

EBL SERIES LED FLASHLIGHTS

These are the last flashlights that you will ever need to buy. SarteK has incorporated new High Power LED technology to create dependable, economical dive lights that produce 3 to 4 times the light output of an equivalent wattage incandescent light. SarteK uses LEDs that have the highest light/watt output of any LED ever made, with a cool white beam (6000 degrees K) they can have a life of up to 100,000 hours. LED lights do not have a filament or a fragile enclosure, so they are extremely tough and perfectly suited for diving. In fact, we back these lights with a lifetime warranty against material or workmanship defects.

The light housings are double O ring sealed and turn on and off by a simple twist of the lens bezel. They will produce a useable white light even with nearly dead batteries. The EBL6600 lights can be converted to a canister light system in less than a minute, with an optional adapter. All EBLs are depth rated to over 1000'.

EBL SERIES LED FLASHLIGHTS

Model	Lumens	Light source	Power source	Full Power Burn	Total Burn
EBL1	6.0	(3) T13/4	(1) 3.6v Lithium	20+ Hrs.	100 Hrs.
EBL3	8.4	(4) T13/4	(3) "AA" Cells	20+ Hrs.	100 Hrs.
EBL5000C	220	5W Single	(3) "D" Cells	5+ Hrs.	24+ Hrs.
EBL5000D	220	5W Single	(3) "D" Cells	10+ Hrs.	30+ Hrs.
EBL2200	220	5W Single	(3) "AA" Cells	2+ Hrs	3+ weeks
EBL2200LI	220	5W Single	(1) Lithium Ion Rechargeable	2+ Hrs	1+ week
EBL6600C	660	5W Triple	(3) "C" Cells	3+ Hrs	24+ Hrs.
EBL6600D	660	5W Triple	(3) "D" Cells	5+ Hrs.	36+ Hrs.
